6. AMENDMENTS TO THE SECTION ENTITLED "6. ERSTE GROUP BANK AG" COMMENCING ON PAGE 268 OF THE ORIGINAL PROSPECTUS

The information contained in the subsection entitled "6.6 RECENT DEVELOPMENTS" on page 283 of the Original Prospectus, is replaced by the following:

"Erste Group's outlook as presented in the annual report 2016 is as follows:

Erste Group expects a return on tangible equity (ROTE) of more than 10% in 2017. The anticipated solid macro-economic development in the core markets Czech Republic,

Slovakia, Hungary, Romania, Croatia, Serbia and Austria, the unchanged positive assessment of the Issuer's risk profile and the reduction of banking tax in Austria should be supportive factors to achieve this target. On the other hand, the persistent low interest rate environment, the non-recurrence of one-off effects such as the sale of VISA shares and potential – and as yet unquantifiable – political risks might jeopardize it.

In 2017, the positive development of the economy should be reflected in growth rates (real GDP growth) between 1.5% to 4.5% in Erste Group's CEE core markets. All other economic parameters are currently expected to develop likewise robustly. Unemployment rates should decline further – in the Czech Republic and in Hungary they are already among the lowest in the EU. Inflation is forecast to remain low and strong competitive positions should again lead to current account surpluses. The fiscal situation and public debt levels are also projected to remain sound. In Austria, by contrast, growth is forecast to be less dynamic, at a rate of 1.5%. Unemployment is expected to stabilise in 2017 after rising in 2016. Overall, growth continues to be driven by domestic demand across all economies, even though exports are expected to make a positive contribution to growth in most countries.

Against this backdrop, Erste Group expects mid-single digit net loan growth which is required to offset margin pressure resulting from sovereign bond reinvestments in the ongoing low interest rate environment. The improvement in asset quality also has an adverse impact on net interest income. With every further reduction of the NPL portfolio – driven, on the one hand, by NPL sales but also by the improved portfolio quality – net interest income will decline on the back of the lower unwinding effect. Overall, Erste Group expects that, at best, it will be able to keep net interest income stable in 2017. If the interest rate environment remains unchanged, a slight decline might also be possible, though.

The second key income component, net fee and commission income, is expected to remain at about the same level in 2017 as in the previous year. Some positive momentum should come from the anticipated rising loan demand and the dynamic economic environment. After a weak year in 2016, the securities business should also pick up again. The other income components are expected to remain flat, by and large, despite the volatility of the net trading and fair value result. Operating income should hence remain stable in 2017 or decline marginally in the case of lower-than-expected loan growth.

Operating expenses are expected to rise by 1% to 2% in 2017. This cost inflation will be mainly driven by IT investments necessary to secure Erste Group's future competitiveness and measures induced by regulatory requirements. Further investments in product simplification, process standardisation or the group-wide implementation of the digital platform George underline the digital strategy. After its rollout in Austria, George will be launched in the Czech Republic, in Slovakia and Romania in 2017. Additional cost drivers are regulatory expenses related for example to the implementation of IFRS 9 from the beginning of 2018 or to preparations for Anacredit, a Europe-wide bank loans dataset overseen by the ECB. The operating result is therefore projected to slightly decline in 2017.

Risk costs should again support net profit in 2017. While the low interest rate environment has a negative impact on net interest income, it does have a positive effect on risk costs which, unlike net interest income, benefit additionally from the reduction of NPL. Erste Group, however, does not expect a recurrence of the historically low risk cost level of the year 2016 of just 15 basis points of average

customer loans. While precise forecasts are difficult in the current environment, Erste Group projects for 2017 risk costs of about 30 basis points of average customer loans.

Other result is anticipated to develop positively. Even though the one-off effects of the sale of VISA shares will not recur, banking tax in Austria is set to decrease after the one-off payment of EUR 200.9 million to the Austrian innovation fund in 2016. As a result, this line item will improve barring the occurrence of any unforeseen events.

Assuming a similar tax rate as in 2016 and a similar level of minority charges, Erste Group aims to achieve a return on tangible equity (ROTE) of more than 10%.

Potential risks to the guidance are the impact from expansionary monetary central bank policies including negative interest rates, political risks e.g. related to various elections in key EU economies, geopolitical risks and global economic risks or consumer protection initiatives."
