Section D – Risks		
D.2	Key risks that are specific to the Issuer:	<p>The Securities are general unsecured obligations of the Issuer. Investors in the Securities are exposed to the risk that the Issuer could become insolvent and fail to make the payments owing by it under the Securities.</p> <p>The Issuer is exposed to a variety of risks that could adversely affect its results of operations and/or financial condition, including, among others, those described below:</p> <p>All references to the Issuer set out below are describing the consolidated businesses carried out by Credit Suisse Group AG ("CSG") and its subsidiaries (including the Issuer) and therefore should also be read as references to Credit Suisse Group AG.</p> <p>Liquidity risk:</p> <ul style="list-style-type: none"> • The Issuer's liquidity could be impaired if it is unable to access the capital markets or sell its assets, and the Issuer expects its liquidity costs to increase. • The Issuer's businesses rely significantly on its deposit base for funding. • Changes in the Issuer's ratings may adversely affect its business. <p>Market risk:</p> <ul style="list-style-type: none"> • The Issuer may incur significant losses on its trading and investment activities due to market fluctuations and volatility. • The Issuer's businesses are subject to the risk of loss from adverse market conditions and unfavourable economic, monetary, political, legal and other developments in the countries it operates in around the world. • The Issuer may incur significant losses in the real estate sector. • Holding large and concentrated positions may expose the Issuer to large losses. • The Issuer's hedging strategies may not prevent losses. • Market risk may increase the other risks that the Issuer faces. <p>Credit risk:</p> <ul style="list-style-type: none"> • The Issuer may suffer significant losses from its credit exposures.

		<ul style="list-style-type: none"> • Defaults by one or more large financial institutions could adversely affect financial markets generally and the Issuer specifically. • The information that the Issuer uses to manage its credit risk may be inaccurate or incomplete. <p>Risks relating to Credit Suisse Group AG’s strategy:</p> <ul style="list-style-type: none"> • Credit Suisse Group AG and its subsidiaries including the Issuer may not achieve all of the expected benefits of its strategic initiatives. • Credit Suisse Group AG has announced a programme to evolve its legal entity structure and cannot predict its final form or potential effects. <p>Risks from estimates and valuations:</p> <ul style="list-style-type: none"> • Estimates are based upon judgment and available information, and the Issuer’s actual results may differ materially from these estimates. • To the extent the Issuer’s models and processes become less predictive due to unforeseen market conditions, illiquidity or volatility, the Issuer’s ability to make accurate estimates and valuations could be adversely affected. <p>Risks relating to off-balance sheet entities:</p> <ul style="list-style-type: none"> • If the Issuer is required to consolidate a special purpose entity, its assets and liabilities would be recorded on its consolidated balance sheets and it would recognise related gains and losses in its consolidated statements of operations, and this could have an adverse impact on its results of operations and capital and leverage ratios. <p>Country and currency exchange risk:</p> <ul style="list-style-type: none"> • Country risks may increase market and credit risks the Issuer faces. • The Issuer may face significant losses in emerging markets. • Currency fluctuations may adversely affect the Issuer’s results of operations. <p>Operational risk:</p> <ul style="list-style-type: none"> • The Issuer is exposed to a wide variety of operational risks, including information technology risk. • The Issuer may suffer losses due to employee misconduct. • The Issuer’s risk management procedures and policies may not always be effective. <p>Legal and regulatory risks:</p> <ul style="list-style-type: none"> • The Issuer’s exposure to legal liability is significant. • Regulatory changes may adversely affect the Issuer’s business and ability to execute its strategic plans. • Swiss resolution proceedings and resolution planning requirements may affect the Issuer’s shareholders and creditors. • Changes in monetary policy are beyond the Issuer’s control and difficult to predict. • Legal restrictions on its clients may reduce the demand for the Issuer’s services. <p>Competition risks:</p> <ul style="list-style-type: none"> • The Issuer faces intense competition in all financial services markets and for the products and services it offers. • The Issuer’s competitive position could be harmed if its reputation is damaged. • The Issuer must recruit and retain highly skilled employees. • The Issuer faces competition from new trading technologies.
D.6	<p>Key risks that are specific to the Securities and risk warning that investors may lose value of entire</p>	<p>The Securities are subject to the following key risks:</p> <ul style="list-style-type: none"> • The issue price or the offer price of the Securities may be more than the market value of such Securities as at the issue date, and more than the price at which the Securities can be sold in secondary market transactions. The issue price or the offer price of the Securities may take into account, where permitted by law, fees, commissions or other amounts relating to the issue, distribution and sale of the Securities, or the provision of introductory services, expenses incurred by the Issuer

investment or part of it:

- in creating, documenting and marketing the Securities and amounts relating to the hedging of its obligations under the Securities.
- The market value of the Securities, any Coupon Amount(s) payable and the amount payable or deliverable at maturity depend on the performance of the underlying asset(s). The performance of an underlying asset may be subject to sudden and large unpredictable changes over time (known as "volatility"), which may be affected by national or international, financial, political, military or economic events or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities.
 - A secondary market for the Securities may not develop and, if it does, it may not provide the investors with liquidity and may not continue for the life of the Securities. Illiquidity may have an adverse effect on the market value of the Securities. The price in the market for a Security may be less than its issue price or its offer price and may reflect a commission or a dealer discount, which would further reduce the proceeds you would receive for your Securities.
 - The market value of the Securities will be affected by many factors beyond the control of the Issuer (including, but not limited to, the creditworthiness of the Issuer, the interest rates and yield rates in the market, the volatility of the underlying asset(s) (if any), etc.). Some or all of these factors will influence the value of the Securities in the market.
 - The total size of Securities being issued on the issue date may be greater than the amount subscribed or purchased by investors as the dealer may retain some of the Securities as part of its issuing, market-making and/or trading arrangements or for the purposes of meeting future investor demand. The issue size of the Securities should not be regarded as indicative of the depth or liquidity of the market, or the demand, for the Securities.
 - The levels and basis of taxation on the Securities and any reliefs from such taxation will depend on an investor's individual circumstances and could change at any time. The tax and regulatory characterisation of the Securities may change over the life of the Securities. This could have adverse consequences for investors.
 - In certain circumstances (for example, if the Issuer determines that its obligations under the Securities have become unlawful or illegal, following an event of default or following certain events affecting the Issuer's hedging arrangements and/or underlying asset(s)) the Securities may be redeemed prior to their scheduled maturity. In such circumstances, the Unscheduled Termination Amount payable may be less than the original purchase price and could be as low as zero. No other amounts shall be payable in respect of the Securities on account of interest or otherwise following such determination by the Issuer.
 - Following early redemption of Securities, investors may not be able to reinvest the redemption proceeds in an investment having a comparable rate of return. Investors in Securities may therefore lose some or all of their investment in such case.
 - The value of an underlying asset to be delivered, together with any fractional cash amount, may be less than the purchase amount paid by a Securityholder for the Securities. In the worst case, the underlying asset to be delivered may be worthless. Securityholders will be exposed to the risks associated with the issuer of such underlying asset and the risks associated with such underlying asset. Further, Securityholders may be subject to certain documentary or stamp taxes in relation to the delivery and/or disposal of such underlying asset.
 - Investors will have no rights of ownership, including, without limitation, any voting rights, any rights to receive dividends or other distributions or any other rights with respect to any underlying asset referenced by the Securities.
 - Investors may be exposed to currency risks because the underlying asset(s) may be denominated in a currency other than the currency in which the Securities are denominated, or the Securities and/or underlying asset(s) may be denominated in currencies other than the currency of the country in which the investor is resident. The value of the Securities may therefore increase or decrease based on fluctuations in those currencies.

- The Issuer may apply any consequential postponement of, or any alternative provisions for, valuation of an underlying asset following certain disruption events in relation to such underlying asset, each of which may have an adverse effect on the value of and return on the Securities.
- Securityholders will be exposed to the performance of each underlying asset and, in particular, to the underlying asset which has the worst performance. This means that, irrespective of how the other underlying assets perform, if any one or more underlying assets fail to meet the specified threshold or barrier, Securityholders could lose some or all of their initial investment.
- The performance of a share is dependent upon macroeconomic factors which may adversely affect the value of Securities. The issuer of a share has no obligation to any Securityholders and may take any actions in respect of such share without regard to the interests of the Securityholders, and any of these actions could adversely affect the market value of and return on the Securities. Securityholders will not participate in dividends or other distributions paid on such share.
- The Issuer may modify the terms and conditions of the Securities without the consent of Securityholders for the purposes of (a) curing any ambiguity or correcting or supplementing any provision if the Issuer determines it to be necessary or desirable, provided that such modification is not prejudicial to the interests of Securityholders, or (b) correcting a manifest error.
- Subject to the conditions and other restrictions set out in the terms and conditions of the Securities, the Issuer may adjust the terms and conditions of the Securities without the consent of Securityholders following certain events affecting the Issuer's hedging arrangements and/or the underlying asset(s), or may early redeem the Securities at an amount which may be less than the initial investment.
- In making discretionary determinations under the terms and conditions of the Securities, the Issuer and the calculation agent may take into account the impact on the relevant hedging arrangements. Such determinations could have a material adverse effect on the value of and return on the Securities and could result in their early redemption.
- Subject to the conditions and other restrictions set out in the terms and conditions of the Securities, the Issuer may be substituted without the consent of Securityholders in favour of any affiliate of the Issuer or another company with which it consolidates, into which it merges or to which it sells or transfers all or substantially all of its property.
- Due to the ongoing deterioration of the sovereign debt of several Euro zone countries, there are a number of uncertainties regarding the stability and overall standing of the European Economic and Monetary Union. Events and developments arising from the Euro zone sovereign debt crisis may have a negative impact on the Securities.
- The Issuer is subject to a number of conflicts of interest, including: (a) in making certain calculations and determinations, there may be a difference of interest between the investors and the Issuer, (b) in the ordinary course of its business the Issuer (or an affiliate) may effect transactions for its own account and may enter into hedging transactions with respect to the Securities or the related derivatives, which may affect the market price, liquidity or value of the Securities, and (c) the Issuer (or an affiliate) may have confidential information in relation to the underlying asset(s) or any derivative instruments referencing them, but which the Issuer is under no obligation (and may be subject to legal prohibition) to disclose.
